

AlumaReels have been engineered for ease of use with an easy mounting structure and simple connections.

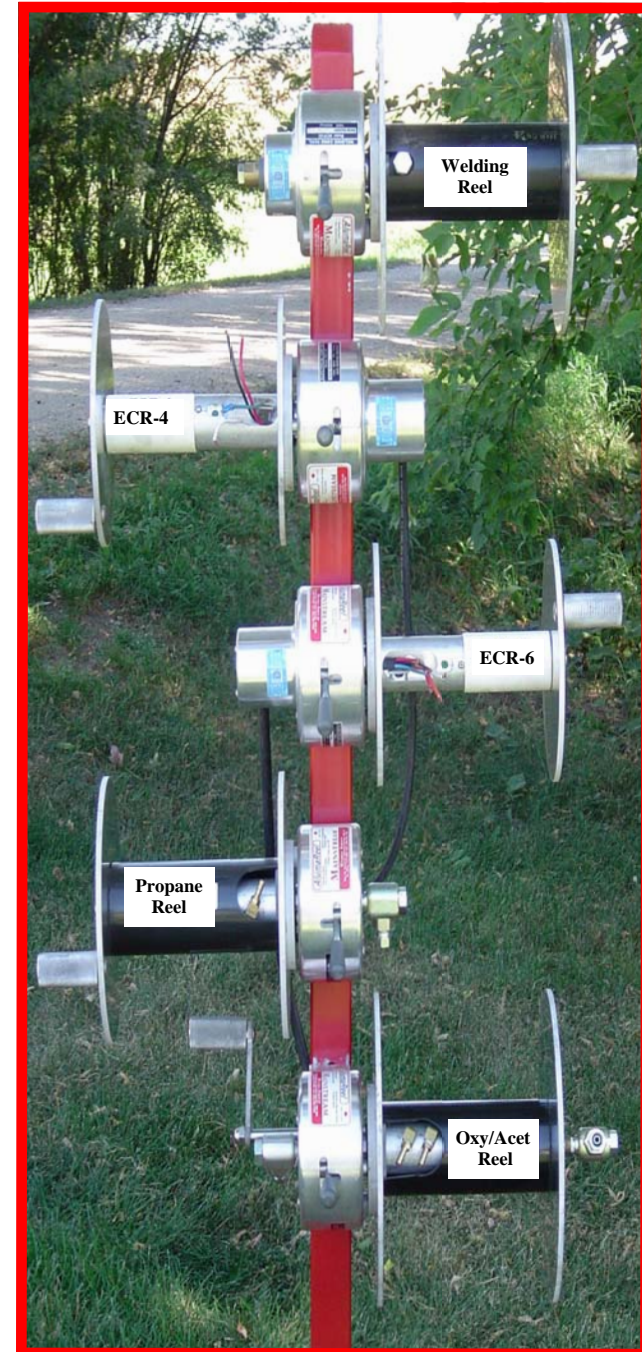

They are very low maintenance and create a tidy workstation.

AlumaReels have a smooth roller bearing rotation and are very user friendly.

We recommend that a certified electrician install the reels that require wiring. We are **NOT** responsible for any damage that could be caused by improper installation.

AlumaReel

 **AlumaReel** offers live connection of power cables for direct wiring to a collector ring assembly allowing continuous current as cable is played out or rewound.

 **AlumaReel** cable reels deliver high quality internal wiring with continuous electrical brass contacts (PVC insulated).

 The direct crank rewind system allows for effortless cable rewinds.

AlumaReels are supplied with a spring loaded locking pin and are fully energized in the unlocked or locked position.

 **AlumaReels** are constructed of aluminum and stainless steel and come in five different models.

PROPANE

4-WIRE REMOTE

OXY/ACETYLENE

6-WIRE REMOTE

WELDING REEL
